

Vishwajeet Bhardwaj

AGENTIC SYSTEM ENGINEER

+91 9065071981 | vishwajeetbhardwaj2612@gmail.com | vishwajeetbhardwaj.com | Muzaffarpur, India

Experience

LAWAZIA TECH PRIVATE LIMITED

Agentic System Engineer

Mumbai, India

Mar 2026 - Present

- Building an AI agent that books services by cleaning and preparing data, designing data pipelines, and using that data to power the agent's decision-making.
- Implemented RAG pipelines and custom tool creation to ground agent responses in relevant data and enable real-world actions.
- Integrated MCP (Model Context Protocol) for structured tool and context integration across the agent workflow.
- Handled end-to-end deployment of the agentic system, ensuring reliability and smooth operation in production.

LTI Mindtree

Data Engineer

Mumbai, India

Aug 2024 - Feb 2026

- Designed and managed scalable ETL pipelines to automate data extraction, transformation, and loading from diverse sources, enhancing overall data workflow efficiency using SSIS and Databricks.
- Tuned and optimized complex problems, improved database performance, and contributed to schema designs.
- Collaborated with business teams to implement solutions that supported reporting, analytics and strategic decision-making, ensured data accuracy and consistency by implementing automated validation checks and monitoring systems within data pipelines.

LAWAZIA TECH PRIVATE LIMITED

Software Developer

Mumbai, India

Aug 2023 - Aug 2024

- Developed backend automation workflows using Node.js and AWS Lambda.
- Built event-driven data processing pipelines using Kafka and Amazon EventBridge.
- Collaborated with cross-functional teams to enhance platform stability and performance.
- Implemented REST APIs and backend modules to support scalable system architecture.

XploreSense Pvt. Ltd

Application Software Developer

Noida, India

Jan 2023 - Jul 2023

- Participated in debugging, testing, and improving application functionality.
- Assisted in software development and backend implementation for web applications.
- Collaborated with development teams to implement features and maintain code quality.

Education

Jaypee University of Engineering And Technology

Bachelor of Technology - Computer Science

Guna, India

- CGPA of 7.1 (on a scale of 10).

Projects

PagnAI (Campaign AI Platform)

Jan 2025 - Nov 2025

- Developed an AI-powered platform for creating and managing digital marketing campaigns.
- Built a scalable backend architecture using Node.js APIs.
- Designed dynamic frontend components using React / Next.js.
- Implemented campaign filtering, editing, publishing, and analytics features.
- Integrated AI-driven content and automation features to improve campaign efficiency.

Tech stack: Node.js, React, Next.js, REST APIs, Cloud Services, AI, Large Language Model (OpenAI)

Skills

Languages Python, JavaScript, TypeScript, SQL

Frameworks & AI React / Next.js, Node.js, LLMs, RAG, MCP, AI Agents, Prompt Engineering

Cloud, Data & Tools AWS (Lambda, EventBridge), Kafka, Databricks, SSIS, REST APIs, System Design, Git
